

Every year, we repair hundreds of customer's home comfort systems because of neglect. These repairs can range from \$300 to \$1,800.

We here at Absolute All American have created the optimum Preventative Maintenance Program. This program is so unique that it will reduce future repair costs while improving your home comfort system's performance and reliability saving you money on your heating and cooling bills.

It is so simple, just give us a call at our office and schedule your Preventative Maintenance and we will send out a Highly-Qualified Service Technician to your home. They will perform a full diagnostic check of your entire comfort system while they complete your factory recommended clean and check which is included in this Preventative Maintenance Agreement and get you signed up.

PROGRAM 1 QUICK START PLAN

The Quick Start Plan is the beginning of restoring your system's operating performance. A clean and check service that inspects your home comfort system for any performance deprivation issues stemming from lack of regular comfort system maintenance.

PROGRAM 2 CONTINUED REGULAR MAINTENANCE PLAN

A Continued Regular Maintenance Plan is for both cooling and heating seasons. A two-season combined 25-point precision tune-up enhances the system's performance and helps lower your heating and cooling costs. It also includes an additional savings up to 15% on repair parts..

PROGRAM 3 EXTENDED COVERAGE PLAN

Our "No-Cost Guarantee" Emergency Breakdown Service call. Under the coverage, if you experience a comfort system breakdown during the coverage plan year, we offer one emergency service call with free repair labor and free service replacement parts. These parts and guarantees are outlined in our maintenance program brochure.
